

DISTINCTIVE DESIGN

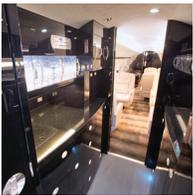

All of the places you live, work and play have been customized to meet your specific needs and likes. That personalized approach should be the same when it comes to the interior of your aircraft.

If there is an amenity that provides comfort, convenience or just makes life easier, the creative and innovative minds at Pentastar Aviation® will create a solution that brings your vision to life. Our in-house Interior Design Studio features a talented team of designers and master craftsmen whose ingenuity, artistry, and attention to detail is unsurpassed. With experience on aircraft large and small, Pentastar Interior Services offers a world of style, sophistication, and distinctive design...resulting in an aircraft cabin that is made exclusively for you.

Design and Engineering

Virtually limitless capabilities in full interiors, cabin reconfiguration, and avionics. Our services include research, design, engineering, certification, installation, and guaranteed airworthiness compliance.

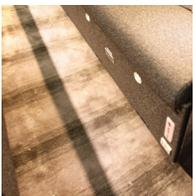

Custom Cabinetry

We use only the finest materials on everything from minor cabinet alterations to custom cabinet design and builds.

Custom Upholstery

The smallest of details can have the biggest impact on your interior. With our capabilities for monogramming and unique stitching, the possibilities are endless.

Custom/Tailored Carpets

Offering several manufacturers with limitless colors and patterns, you are sure to find a fit tailored to your individual taste.

Cabin Management Systems

Whether it's a system retrofit or new system integration, we design it to allow you to sit back, relax and have access to anything you need right at your fingertips.

LED Lighting

Create the perfect ambiance with lavatory lighting, table and reading lights, work and effect lighting, and emergency lighting. We also have full retrofit capabilities.

Cabin Entertainment Systems/ Connectivity Solutions

Custom designed systems based on your needs deliver a unique solution that captivates the senses.

Sound Deadening and Insulation

Materials specifically designed to enhance your aviation experience and maximize cabin acoustics.
