

# GET THE BIG PICTURE.

Securaplane's airborne video cameras allow for high definition views during all phases of flight. The CMX-HD camera offers multiple functions for aircraft to provide an enhanced experience for aviators and passengers including in-flight entertainment, situational awareness and gear position viewing.

Fuselage Underside Installation

Vertical Fin Installation

Vertical Fin Installation

big  
picture

Available for installation on the vertical fin and fuselage belly, Securaplane's CMX-HD series airborne cameras are:

- Fully qualified and certified
- Lightweight
- Sharp, true HD 1080p video
- Aerodynamic in design and incorporates a damage-resistant heated sapphire glass window

Securaplane chose Pentastar's engineering team to develop the STC for the CMX-HD camera system due to our decades of experience providing the best industry-leading avionics system integration design, service and maintenance. This experience also allows us to conduct the modification in a timely manner and get you back in the air as quickly as possible.
