

PUT UNMANNED AIRCRAFT SYSTEMS TO WORK FOR YOUR BUSINESS

The complex field of Unmanned Aircraft Systems (UAS) is always changing and its application to everyday business is growing exponentially. UAS, sometimes called drones, are aircraft without a human pilot onboard. Instead, the UAS is controlled by an operator on the ground. At Pentastar Aviation, we believe that UAS can be an important part of your business — today and in the future.

The possibilities and opportunities this technology offers include:

- Aerial Photos
- Mapping
- Surveillance
- Construction Monitoring
- Real Estate Acquisition
- Media
- Infrastructure Inspections

Aaron Cook | UAS Team Leader

- Nationally recognized expert in Unmanned Aircraft Systems
- Co-chair of the American Society of Mechanical Engineers standards committee for UAS inspection of critical infrastructure
- Created and managed successful UAS business
- Developed one of the first UAS collegiate degree programs in the country
- Recipient of Michigan Aeronautics Commission Award of Excellence in 2013

Please contact us if you have any questions about UAS and how this technology can help your business.
